MONGOLIA SOLAR ECLIPSE TOUR
JULY 29-AUGUST 4, 2008

August is a great month to visit Mongolia with excellent weather prospects for the afternoon solar eclipse of 2008. We’re offering a week-long core itinerary that focuses on the eclipse itself and if you wish to enjoy more of Mongolia (Gobi Desert, Lake Khovsgol, etc.) you may choose from several add-on itineraries for additional travel before or after the eclipse. We also offer customized itineraries for private touring before or after the eclipse.

Boojum Expeditions brought the largest group of eclipse watchers to Mongolia in 1997 for the total solar eclipse in March of that year. We understand the priorities of eclipse chasers and are eager to let the eclipse serve to show off the history, landscape and fascinating culture of Mongolia.

For the eclipse tour, we have a tent camp in the Altai Mountains in Western Mongolia which border Kazakhstan and Russia, and will be our base for two nights, including the day of the eclipse. Our viewing site for the day of the eclipse will be in the Altai Mountains with a great view to the west and spectacular scenery all around. While it is important to remember that infrastructure in Mongolia is still undeveloped, our camp will have dining tents, a temporary bath house and toilets. Sleeping will be in comfortable mountain tents on a double occupancy basis. Traveling to and from our eclipse camp, you’ll stay in ‘ger camps’, the equivalent of a Mongolian motel. At the ger camp, there will be a communal dining hall and bathhouse, and guests sleep in traditional walk-in tents (gers) furnished with typical beds and other furniture.

The best way to get to Mongolia from North America is via Seoul, Korea (ICN). Ulaan Baatar can also be reached from Beijing, Moscow, Berlin and Osaka.

If you’d like a map of Mongolia to begin your travel plans, we sell the best map available for $9 USD including postage in the US. Call to order 1-800-287-0125.
